

# Pioneer Well No. 1

Is now down 1260 feet and rapid progress is being made daily

Fred M. Allison, the expert in charge of operations states that the indications are excellent, the formations closely resembling those at similar depths in the famous Spindle Top field. He also states that the formations are entirely different from those on the north side of Success Bay. The failure of the White Point field, therefore, enhance the possibilities on the south side of the Bay, inasmuch as experts are all agreed that a great oil field will be brought in somewhere in this vicinity.

# A Great Oil Field

at Corpus Christi's back door means two things. First—Wealth for those who bring it in. Second—Corpus Christi one of the great cities of the Southland.

This company is a home concern, composed of home people, who believe the things they are doing will benefit their city. They believe therefore, that citizens of Corpus Christi should support their enterprise. Many have already done so; the support of others is needed.

The company makes no promises. It believes its chances are excellent. If they materialize the value of stock will multiply from ten to a hundred fold.

Drive out to the well today and see the largest and best drilling outfit in South Texas, and as good and as large as any made. The drillers will be glad to explain things to you and answer any questions you may care to ask.

Then call at the office of the company and subscribe for a few shares of stock. Remember, "nothing risked; nothing gained."
